

THE  
QUALITY CHOICE  
FOR ALL  
YOUR POWER NEEDS

# POMPOWER

## LEAFLET OF PRODUCTS

- ⚡ Grid Renewable Energy Storage Systems (ESS)
- ⚡ Multifunctional Power Conversion Systems
- ⚡ Battery Energy Storage Systems (BESS) ⚡ Data Center Infrastructures
- ⚡ Modular UPS Systems ⚡ Online UPS Systems ⚡ Lithium Batteries
- ⚡ Solar Modules ⚡ Solar On-Grid Inverters ⚡ Solar Off-Grid Inverters
- ⚡ Solar Hybrid Inverters ⚡ Solar Street Lights ⚡ EV-DC Fast Chargers
- ⚡ Frequency Converters ⚡ DC Power Supplies ⚡ Ultra Isolation Transformers
- ⚡ Servo Controlled Voltage Stabilizers

## Grid Renewable Energy Storage Systems (ESS)

**Model: PPESC-DC**  
Range : 50kW/75kWh  
to 200kW/300kWh

**Model: PPESC-AC**  
Range : 300kW/645kWh  
to 400kW/1075kWh

- ◆ Bidirectional AC / DC converter can realize the bidirectional conversion from DC to AC and AC to DC. It can not only convert AC to DC to charge battery, but also convert DC to AC to supply power to load or feedback to power grid.
- ◆ The system mainly consists of safe, efficient and long-life lithium iron phosphate cells, which are connected in series to form battery modules, and multiple modules are connected in series to form battery clusters.
- ◆ The core components of the system can effectively protect the battery from overcharge, over discharge and over-current. At the same time, the balanced management of the cells can ensure the safe, reliable and efficient operation of the whole system.

## Multifunctional Power Conversion Systems

**Model:**  
**PP-Integrated PCS:**  
50KW to 600KW

**Model:**  
**PP-Hybrid Solar PCS:**  
50KW to 150KW  
**Model: PP-Rack PCS:**  
50KW to 100KW

- ◆ POM Power multi- functional bi - directional can realize the bi-directional conversion from DC to AC and from AC to DC.
- ◆ It can not only convert AC into DC to charge the battery, but also convert DC into AC to supply power to the load or feedback to the grid.
- ◆ The systems adopt advanced digital control technology, which optimizes the control performance and improves the reliability of the system.
- ◆ It can realize seamless switching between grid connected discharge, grid connected charging and off grid operation modes.

## Battery Energy Storage Systems (BESS)

**Model: PBESS - 5000**  
Rated Power :  
250KW-614KW

**Model: PBESS-5001**  
Rated Power :  
600KW-1.84MWh

- ◆ Its Efficient and effective use of renewable energy sources.
- ◆ Its intelligent and modular power supply equipment with integrating lithium battery and MPCS.
- ◆ Our ESS offers environmental protection, noise free, high reliability and high security power services.
- ◆ High quality LFP batteries for mobile use.
- ◆ From cell to container, hierarchical temperature control strategy with industrial grade temperature control system.
- ◆ Battery module is designed with PC bracket and reinforce steel structure to guarantee the highest safety of the system, in transportation, installation and operation.

## Data Center Infrastructures

**Model: PPDC-6000**

- ◆ POM Power Micro Data Centre Infrastructure is an integrated cabinet which contains cooling systems, Power system, Monitoring System and rack system etc.
- ◆ Its Cost effective compared to enterprise data centers, the operating expenses of micro data centers are much lower.
- ◆ POM Power Data center has flexible infrastructure approach and depending on demand. Data collection and storage, alarm management, energy consumption analysis, Remote access etc.

## Modular UPS Systems

**Model:**  
PPS-2004-MS  
**Range:**  
6KVA to 1200KVA

- ◆ Multiple redundancy measures, perfect fault isolation protection.
- ◆ Advanced DSP digital control technology
- ◆ Master-slave synchronization in sequence control, multi-level decentralized control technology
- ◆ Supports integrating with one battery pack
- ◆ Adaptive lead-acid battery or lithium battery system, complete battery management function.
- ◆ Rack mounted DSP series UPS integrates structural design and lithium battery modules.
- ◆ UPS combined with lithium battery system, upholding the principle of green environmental protection, energy saving and high efficiency, longer service life, reduce the frequency of user replacement and save costs.

## Online UPS Systems

**Model:PPS-2001-SP**  
(1KVA to 5KVA)  
**Model:PPS-2002-TSP**  
(6KVA to 30KVA)  
**Model:PPS-2003-TP**  
(10KVA to 200KVA)

- ◆ POM POWER UPS Compared lithium battery has obvious advantages in capacity, footprint, temperature range, and service life.
- ◆ Using lithium batteries as a UPS backup power can greatly improve system performance.
- ◆ Rack-mounted DSP series UPS integrates power electronic technology and digital control technology, and perfectly integrates structural design and lithium battery modules.
- ◆ UPS combined with lithium battery system, upholding the principle of green environmental protection, energy saving and high efficiency, longer service life, reduce the frequency of user replacement, and save costs.

## Lithium batteries

**Model:**  
PPLB-3000  
**Battery capacity**  
40Ah to 280Ah

- ◆ High quality iron phosphate lithium battery.
- ◆ Intelligent air-cooling design, long service life, stable operation.
- ◆ Three level BMS design of module, cabinet and system, multiple state monitoring, hierarchical linkage, comprehensive guarantee of battery system safety.
- ◆ Battery module is designed with PC bracket and reinforce steel structure to guarantee the the highest safety of the system, in transportation, installation and operation.

## Solar Modules

**Model:**  
Mono PERC  
**Range:**  
545W to 670W above

- ◆ POM POWER Solar Modules made up of a series of interconnected solar cells that are encapsulated in a weatherproof casing.
- ◆ The solar cells are connected in series to provide the required standard output voltage and power.
- ◆ The output from a solar module depends on some conditions such as ambient temperature and intensity of incident light.

## Solar On-Grid Inverters

**Model: PPOG-2001-SP**  
(1KW to 11KW)  
**Model: PPOG-2001-TP**  
(3KW to 345KW)

- ◆ High Performance: Low start-up voltage, wide voltage range, 97.4% maximum efficiency.
- ◆ IP65 Rated: Engineered to last with maximum flexibility. Suitable for outdoor installation.
- ◆ Remote Monitoring: Monitor your system remotely via smartphone app or web portal (via RS232/Modbus/SNMP/GPRS (optional)).
- ◆ POM Power solar inverter is one of the most crucial elements of any solar energy system.
- ◆ Our systems usable for a wide variety of Residential, Commercial as well as industrial applications such as powering various ranging offered by POM Power.

## Solar Off-Grid Inverters

**Model:**  
**PPOF-2002-SP**  
(1KW to 10KW)

- ◆ POM Power Off-Grid Inverter distributes solar power between home electrical appliances (load) and charges the battery simultaneously for backup for use during power cuts and evenings, also we helping you in reducing your monthly power bill.
- ◆ The inverter unit covers a broad operating voltage and frequency range to achieve high efficiency. The built-in MPPT charge controller ensures maximum output from solar panels.
- ◆ Monitor your system remotely via smartphone app or web portal (via: RS232/Modbus/SNMP/GPRS (optional)).

## Solar Hybrid Inverters

**Model:**  
**PPHB-2003-SP**  
(3KW to 8KW)  
**Model:**  
**PPHB-2003-TP**  
(4KW to 33KW)

- ◆ POM Solar Hybrid inverter is suitable for residential and light commercial use, maximizing self-consumption rate of solar energy and increasing your energy impedance.
- ◆ During the day, the PV system generates electricity which will be provided to the loads initially. Then, the excess energy will charge the battery via POM Systems. Finally, the stored energy can be released when the loads require it. The battery can also be charged by the diesel generator to ensure uninterrupted supply in the event of grid blackout.
- ◆ Monitor your system remotely via smartphone app or web portal (via RS232/Modbus/SNMP/GPRS (optional)).

## Solar Street Lights

**Model:**  
**PPOF-2002-SP**  
(1KW to 10KW)

- ◆ POM Solar – Powered Street light can offer environmental – friendly solutions to communities.
- ◆ Our solutions widely used for Industrial, also Commercial segments with all ranging offered.
- ◆ POM always considered many cost effective solutions, safe installation, maintenance free, No energy bill etc.

## EV-DC Fast Chargers

- ◆ The power covers 60KW ~ 360KW, and can be configurable single, dual or triple connectors to meet the changing charging needs of customers.
- ◆ Comply with multiple standards as CCS, CHAdeMO, GB/T AC Type 2
- ◆ Multiple outputs: DC power covers 60kW ~ 360kW, AC power up to 43kVA
- ◆ Supports CCS, CHAdeMO and AC Type 2 charging outputs simultaneously.
- ◆ Communication Protocols: OCPP1.6J (OCPP 2.0 upgradable)
- ◆ Reliable, robust, modular system hardware
- ◆ Simple, quick and easy installation.

## EV-Wallmount Fast Chargers

- ◆ POM DC Wallbox 30kW charger is a configurable single or dual outlet wall mounted DC fast charger, supporting the changing needs of each customer. With compact, space-saving and attractive design, it is ideal for a wide range of installations, both indoors and outdoors available
- ◆ DC power up to 30KW
- ◆ Supports a single CCS1/CCS2/ CHAdeMO connector
- ◆ Overall efficiency ≥95%
- ◆ Simple installation, convenient operation
- ◆ Daylight readable touch screen display
- ◆ Built-in safety measures
- ◆ Robust design
- ◆ Low operational noise
- ◆ Support multi-language operation

## Frequency Converters

- ◆ POM Power frequency converter is an electronic device that converts AC of one frequency to alternating current of another frequency.
- ◆ POM frequency converters both single and three phase input/output with variable frequency from 60HZ to 400HZ.
- ◆ We offered various industries to give constant amplitude and frequency.
- ◆ We are providing Superior design and quality.
- ◆ Our manufacturing concerned given most priority for highest quality components, with precise assembly, subjected to high quality testing and inspection procedures.

## DC Power Supplies

- ◆ Double conversion topology technology, pure sine wave output.
- ◆ Advanced DSP digital control technology.
- ◆ Environment Friendly and energy saving, as the input power factor is up to 0.99.
- ◆ Wide input voltage and frequency range, 110 VAC --240 VAC, 40 -- 70 Hz.
- ◆ ECO mode optional, reduce the UPS power consumption.
- ◆ Low audible noise (below 50 dB), will not affect your daily life.

### Ultra Isolation Transformers

**Ranges:**  
1KVA – 500KVA,

- ◆ POM Power condition enterprise offering substantial safety solutions to your electric and electronic equipment's.
- ◆ We are the best isolation transformer manufacturers and provides quality isolation transformer to protect various sensitive and costly appliances used at many applications.
- ◆ POM Isolation transformers are designed with the same number of primary and secondary winding coils. So there won't be voltage regulation and correction.
- ◆ Our Design transformers that are long lasting, efficient, and give a hassle-free performance.

### Servo Controlled Voltage Stabilizers

**Ranges:**  
3KVA-1000KVA  
(Air & Oil Cooled)

- ◆ POM Power offers, when the voltage from the mains fluctuates widely, a servo stabilizer can keep the voltage from the generator constant.
- ◆ It prevents damage to expensive machinery caused by fluctuations in voltage.
- ◆ Our systems operates both over and under voltages pose a threat to the vital components of electrical machinery.
- ◆ The only way to use POM Power servo voltage stabilizer or other suitable POM systems and service devices to adjust the voltage.

We supply Inverters, SMF and Tubular Batteries of the leading brands namely POM Power, Exide, Amaron, Panasonic and Other Reputed Brand Batteries for various applications including Solar, Commercial and Residential sectors.

**POM** Systems & Services Pvt. Ltd., a Reputable and Leading company with over 25 years of experience in the field of Power Electronics, we specialize value added products in Energy Storage Solutions Like Grid Renewable Energy Storage Systems, Multifunctional Power Conversion Systems, Battery Energy Storage Systems and Lithium Batteries. We also specialize in Data Center Infrastructures like Micro Data Centers, Modular Data Centers, Modular UPS Systems, Online UPS Systems. And we also specialize Solar Power Products and plants, EV-DC Fast Chargers, and DC Power Supplies.

**POM** Systems & Services is committed to providing its customers with the highest quality products and services. The Company's team of experienced engineers and technicians is available to provide support and assistance throughout the entire process, from design and installation to maintenance and support.

**POM** Systems & Services is a trusted partner for business and organizations of all sizes. The company's commitment to quality and customer service has made it a leader in the Energy Storage, UPS and Solar Power Industry.

For more information about us please visit company's website [www.pompower.in](http://www.pompower.in)

**Marketing Office:** No-2, D-01, 1st Floor, Solus Jain Heights,  
1st Cross JC Road, Opp: to Bangalore Stock Exchange, Bengaluru-560027.
